Champion Report Template

Theme Area: Transportation

Champions:

Tad Erickson_______________________
Tim Houle P.E _______________________
Jarrett Lease_______________________

Date: October 22, 2013

Complete and submit to Champion Facilitator (Dan Frank) to be compiled, cover highlights in two-minute report at Champion Meeting.

1. Update on progress on your Theme Priorities since our July meeting;

<table>
<thead>
<tr>
<th>Goal #</th>
<th>Description of priority, activity and progress</th>
</tr>
</thead>
<tbody>
<tr>
<td>TII, Action Step T3E, T3F</td>
<td>Aggregate Resource Mapping - The grant application submitted to LCCMR from Region Five and the DNR for aggregate resource mapping was not accepted. It is noteworthy that this application was unique and outside of the box for LCCMR given its regional approach, but was a worthwhile attempt.</td>
</tr>
<tr>
<td>TIV, Action Step T8, T9 and T10</td>
<td>Active Transportation - Staff recently attended the October ATP meeting at the MNDOT District 3A building in Baxter to discuss new developments in the Corridors of Commerce Program, the TAP process, MAP 21, and the update of the ATP operations policy manual.</td>
</tr>
<tr>
<td>TIV, Action Step T8, T9 and T10</td>
<td>Safe Routes To School (SRTS) - Our Safe Routes to School program or Safe Routes Minnesota provides funding to schools to make improvements to the routes children use to walk and bike to school. These improvements may include physical infrastructure changes (like sidewalks and pathways) or non infrastructure programs (like incentives and educational materials for families). Many communities throughout the Region have completed or are in the process of completing SRTS. Most recently Crosby has been awarded funding for SRTS.</td>
</tr>
</tbody>
</table>

1. New opportunities for action/alignment and collaboration:
<table>
<thead>
<tr>
<th>Goal #</th>
<th>Description of opportunity</th>
</tr>
</thead>
<tbody>
<tr>
<td>TII, Action Step T3, T4.</td>
<td><strong>TAP</strong> - The Transportation Alternatives Program (TAP) is a new competitive grant opportunity for local communities and regional agencies to fund projects for pedestrian and bicycle facilities, historic preservation, Safe Routes to School and more. Minnesota will be soliciting approximately $13 million across the state. This program formally replaces the past process for what were commonly referred to as “enhancement” dollars. A letter of intent (LOI) is being requested from interested applicants. Interested applicants are encouraged to submit a letter of intent to the MN DOT district 3 office in Baxter or contact the regional development commissions.</td>
</tr>
<tr>
<td>TIV, Action Step T8, T9 and T10.</td>
<td><strong>Community Transformation Grant (CTG)</strong> - Through this program the Minnesota Department of Health seeks to expand efforts in tobacco-free living, active living, and healthy eating, and quality clinical and other preventive services, all toward a goal of addressing health disparities, helping control health care spending, and creating a healthier future. Region Five staff has met with local CTG coordinators to discuss what role R5DC can play in executing their workplan.</td>
</tr>
</tbody>
</table>

### Transportation

**Transportation Issue I (TI)**

**Public transit**: To improve public transit in the region, we need to answer the following questions: 1) How can regional public transit be a viable alternative to cars for commuters and for both the young and the elderly? 2) What opportunities are there for transit partnerships? 3) Where does it make sense to focus on public transit? and 4) In what ways might the private sector be involved as the need grows?

**Transportation Issue I Goal**

**Transportation**: The goals of our transportation system should be: 1) to get products to markets by focusing on rail and improving/maintaining our main roads; 2) to respect tighter public budgets by prioritizing which roads should be maintained and which ones should be abandoned; and 3) improving transit options to affordably get people to where the jobs are.

### Recommendation T1

**Public transit network**: Establish a connected region-wide public transportation network.

**Action Step T1A**

**Study and improve**: Map existing public transit routes, increase county-wide service, and provide additional transit services for regional hubs. Identify current corridors with the most transit use and promote and plan transit oriented development along those corridors.

**Action Step T1B**

**Role of business**: Work with local businesses and industries to allow employees flexible start and end times. This could encourage using transit, biking, or other transportation alternatives for commuting.

**Action Step T1C**
Connect downtowns and colleges: Make stronger connections between downtown areas and colleges (Staples – Central Lakes College and Brainerd - Central Lakes College).

**Action Step T1D**  
**Land use choices support transit:** Provide vibrant corridors that include adequate and affordable housing, multiple transportation options, and easily accessible public green spaces.

**Action Step T1E**  
**Increase mobility options:** Link mobility in transit planning by incorporating bike options, expanded bus routes and regional needs.

**Action Step T1F**  
**Rail transit:** Extend Northstar commuter rail to Camp Ripley.

**Recommendation T2**  
**Rail and economic development:** Consider additional rail spurs and light rail passenger trains as an economic tool that could link major economic centers in the region.

**Transportation Issue II (TII)**  
**Highways:** How can our highway system and corridors serve the region’s mobility, land use, and economic development needs in a safe manner while linking the other pieces of our transportation system?

**Recommendation T3**  
**Mobility and safety:** Evaluate the current road system to ensure mobility and safety needs are met.  
**Action Step T3A**  
**Regional plan:** Develop a regional transportation plan at least to the County State Aid Highway (CSAH) level.

**Action Step T3B**  
**Complete connections:** Look to connect and complete existing roadways to improve the mobility through the region.

**Action Step T3C**  
**Interregional corridors:** Work to improve interregional highway corridors through the region.

**Action Step T3D**  
**Heavy haul corridors:** Utilize heavy highway haul corridors (10 ton roadways) to transport larger loads (weights) for maximum efficiency.

**Action Step T3E**  
**Maintenance:** Explore and use new roadway surface materials to reduce maintenance time and costs.

**Action Step T3F**  
**Abandonment:** Consider roadway abandonment or lower classification for segments with low use as a cost-saving action.

**Recommendation T4**  
**Technology:** Explore roadway technology and digital communication to ensure the movement of traffic.

**Action Step T4A**  
**Logistics:** Assess the potential for state-of-the-art logistics technologies to improve the efficient transportation of goods and people.
Recommendation T5

Transportation impacts of development choices: Reduce the number of vehicle trips while building a transportation system to serve future population.

Action Step T5A
Local jobs: Provide incentive to keep jobs in region to make transportation easier.

Action Step T5B
Housing near jobs: Provide incentives for workers to live close to their jobs and employers to hire locally.

Action Step T5C
Plan transportation system: Rather than reacting to developer’s plans, communities should first lay out future road locations that will promote adequate transportation corridors and resource protection, and will be financially affordable to maintain in the long term.
**Recommendation T6**

**Alternative transportation:** Increase opportunities for residents to choose alternative transportation to provide efficiency, increase safety and cost savings, support economic development, and reduce environmental impacts.

**Action Step T6A**

**Invest in alternative transportation:** Invest in alternative transportation opportunities that provide seven-day-a-week access to work and recreation. These might include ride sharing, rail, bus shuttles, dial-a-ride, non-motorized options, and affordable air travel.

**Action Step T6B**

**Promotion and incentives:** Promote the use of high miles-per-gallon (MPG) transportation vehicles. Provide incentives like less highway taxes, cheaper tabs, and sales tax reductions or deductions for high miles per gallon (MPT) transportation vehicles.

**Action Step T6C**

**Safety and education:** Promote safety and driver education especially to the senior population through outreach and workshops.

**Recommendation T7**

**Funding:** Collect tax on various items (e.g. cigarettes) to be spent on transportation needs.

**Transportation Issue III (TIII)**

**Alternative transportation:** How do we implement “alternative transportation technologies” such as increasing broadband access throughout the region, which would increase the opportunities for telecommuting and provide an economic benefit for businesses, and promoting alternative-fuel vehicles, which are closer or further from reality, so they serve our region’s needs to provide efficiency, safety, cost savings, and economic development? (Broadband recommendations are included under the “Connectivity” theme.)

**Transportation Issue IV (TIV)**

**Walking and biking:** Adopting and implementing Complete Streets to promote walking, biking, trail use as a transportation option while increasing health and wellness. Developing bike lanes and routes on existing roads where appropriate would encourage biking. Can the region build/invest in a walkable/bikable system that promotes and addresses health needs while acting as an economic development driver, all while enhancing our regional transportation system?
Recommendation T8

Plan for multiple modes: Plan multi-modal options (biking, walking, and autos) on projects where it makes sense.

Action Step T8A
Complete Streets: Incorporate Complete Street design where biking and walking populations support that cause.

Action Step T8B
Bike trails/lanes and support bike services: Leverage current efforts to promote bike trails/lanes. Provide more transportation amenities including bike racks in towns and on buses, bike rental services, bike lanes, and signage.

Recommendation T9
Reconstruction: When streets are reconstructed, connect areas with walking/biking trails for safe travel.

Recommendation T10
Coordinate with MnDOT plan: Tie regional transportation efforts to the Minnesota Department of Transportation Statewide Multimodal Transportation Plan 6 objectives and strategies: Accountability, Transparency and Communication; Transportation in Context; Critical Connections; Asset Management; Traveler Safety; and System Security.

Action Step T10A
Accountability, transparency and communication: Educate stakeholders on system-wide and project-specific transportation issues through workshops provided throughout the region.

Action Step T10B
Transportation context: Support the development of land use policies that minimize long-term costs by taking advantage of investments made in existing infrastructure through iPlaces scenario building software. Work together to improve accessibility and safety for everyone traveling on, along and across roads through promotion of “Complete Streets”.

Action Step T10C
Critical connections: Continue the work to improve the connections between transit and rail services to provide greater transportation options for travel within and between cities.

Action Step T10D
Asset management: Prioritize maintaining and operation assets on identified priority networks through ATP and TAC.

Action Step T10E
Traveler safety: Develop and share critical safety information and support educational initiatives through our active transportation work and prioritize safety through active transportation grants. Implement strategic and sustainable engineering solutions to improve traveler safety through prioritization of STIP projects.

Action Step T10F
System security: Expand emergency communications infrastructure across the state through the county Hazard Mitigation plans.
